1. Introuction

1.1 Description & Disscusion of the Background

Declining birthrate is a important problem in japan. So, child fiendly buisness is a gradually difficult.

Your wife love kids and cook, so your wife would like to open the restaulant main target is family. And, your familly also want make a great profit in restaulant buisness.

Your wife proud of her cokking skill of every genre but have not confidence of management sukills. she doesn't know which types of restaulant the best profit make.

So, you should consider the which genre of restaulant should be open.

And you think it has a relationship to birthlate.

1.2 Data Description

To consider the problemwe can list the datas as below;

- I used Forsquare API to get the common types of restaulant of given Borough of Japan.
- I used a birthlate data from Japan's Statistics Bureau.
